

How to Prep Your Personal Watercraft for Storage

- ☐ Wash hull and deck with mild, non-abrasive cleaner
- ☐ Clean your jet pump and intake grate with a small brush
- ☐ Flush your cooling system with a fresh water flush kit
- ☐ Inspect the hull for cracks or scratches
- ☐ Check handlebars, seat, and other components for wear
- ☐ Add fuel stabilizer to the tank to reduce fuel degradation
- ☐ Run the engine for a few minutes to circulate the treated fuel
- ☐ Fill the fuel tank to reduce condensation and moisture buildup in the tank
- ☐ Disconnect your jet ski's battery (negative terminal first, then positive)
- ☐ Store battery in a cool, dry place connected to a battery maintainer or battery tender, and inspect your battery's voltage and condition every 30-60 days
- ☐ Apply marine-grade lubricant to moving parts, steering, and throttle cables
- ☐ Spray fogging oil into the engine cylinders
- ☐ Store your PWC indoors in a dry, temperature-controlled storage space
- ☐ Use a durable, breathable all-weather cover for protection
- ☐ Check trailer tires for proper inflation
- ☐ Inspect trailer bearings and grease as needed
- ☐ Remove electronics, riding gear, and personal belongings
- ☐ Attach your watercraft to your trailer using trailer locks, cable locks, or U-locks for added security.
- ☐ Update your service records and maintenance log after changing the fluids
- ☐ Review your personal watercraft's insurance and registration policies
